For Immediate Release:

Neuros Medical Receives Visit from Congressman David Joyce

Cleveland, OH, May 29, 2014– Congressman David Joyce of Ohio's 14th District visited Neuros Medical in Willoughby Hills, Ohio for a site tour and roundtable discussion.

Neuros is in the initial stages of their randomized, controlled pivotal clinical trial to evaluate the Company's patented Altius® High Frequency Nerve Block System for the management of intractable limb pain of amputees. The study consists of 130 patients at 15 medical centers in the U.S. When completed, the results will support a PreMarket Approval Application to FDA in order to market the device. The pivotal study builds upon their long-term pilot study which reported significant pain reduction. In addition, more than half of the subjects discontinued their pain medication use during the study.

"We were pleased and honored to welcome Representative Joyce to Neuros," said Jon J. Snyder, President and CEO of Neuros Medical. "We appreciate his interest in our Altius System and the potential it holds for patients suffering from chronic pain."

Representative Joyce was first elected in November 2012 and represents Ashtabula, Geauga, Lake and parts of Cuyahoga, Summit, Trumbull, and Portage counties.
